SIT232 Object‑Oriented Development Assignment 1.3D

Prepared by :

Charitha B. Pieris | BSCP|CS|62|114

In our Discord Server, we're all about learning together and supporting each other. It's a place where anyone can ask questions, and others pitch in with answers. This document shows how we do it.

What We Do:

On our server,The main idea is to create a friendly space where you can ask questions about your studies, and others will help you out. It's like a digital place where we work together to figure out tricky homework and make learning easier. We have separate chat areas for different subjects, so it's easy to find the right place to ask your question.

We also share things like good websites, books, and tools.

The screenshots I've shared show how we come here with the questions, and others step in to help. It's like having a bunch of study buddies who've got your back. We believe that when we learn together, we can achieve more.
